The procla-

mation of that year opened the door for a trade which has now risen to sales of over \$3,190,000 of agricultural produce, of which 85 per cent is carried in American vessels and 15 per cent in foreign vessels. This trade has been a new business created. It could not have been a former new business created. It could not have been a former business turned into new channels, because no other channel shows a corresponding decrease. If, however, we compare the quantity carried to North American colonies in foreign vessels, we find that it is much larger—showing that the facilities afforded by the present regulations of the west indies. lations for carrying American produce to the West Indies in British bottoms, has only induced English vessels to take that route, and it has not diminished the aggregate trade in American vecsels. The effect which the increased colonisl trade has had upon the agricultural interests, is seen as follows:

Table of the Exports of American Prof.
British Colonies.

826 4,369,470 28,679,367 1841 11,704,411 32,425,867

In the period embraced in this table, the agricultural exports have increased \$16,000,000, of which increase 50 per cent has been to the British colonies, and the remain ng \$8,000,000 hes been nearly all to Great Britain direct The conclusion derived from this is, that the colonial trade has been so much added to the commerce and agri. cultural prosperity of the country. It is true, that without the existing restriction, the effect would have been much greater, and in the proposed commercial treaties, these will undoubtedly be done away with. The idea of encouraging the growth of a navy, by restricting commerce, has become "obsolete," since the progress of steam navigation has greatly supplented ships of war.

It now remains to observe the rates of duties imposed in both colonies upon the erticles in the above table of exports. They are as follows, reduced to United States cur.

These are taken from a report of the Secretary of State on commercial relations. It will be observed, that flour, it has been alleged, is taken from the United States in British bottoms, carried to the North American colonise and thence to the West Indies free of duty. The discrimination being \$1.20 per bbl. The table of exports, how ever, shows that this has not been the case; nor, indeed, could it be. The difference of \$1.20 would not pay the extra expenses of the voyage. The Courier and Enquirer would, however, do well to observe the immense inease which has taken place in the export of Indian corn and meal-\$500,000 per annum are now sent to the West Indies, where a few years since none was sent. Will people eat it or not?

From all these data we observe the great and beneficial nerease of mutual trade, which everywhere attends a relaxation of commercial restrictions. If the farmers of this country have derived so great advantages from the partial opening of the trade, what may they not expect from the consummation of the comprehensive project shadow-ed forth by Mr. Webster? The farming interests are the great source of all the wealth of this country—on their prosperity depends the welfare of the shipping interests and the progress of manufactures. These measures, there-fore, that tend most to widen and deepen the channels through which agricultural products pass to market, are in truth and fact advancing the best interests of the country at large. Turning from the magnificent plans of Webster for the gradual attainment of this object, how contemptible do the schemes of the speculators appear, wh would restrict commerce, hamper trade and paralyze in dustry, with a view to make speculators rich with paper oney, and place politicians in power by its corrupt

TO THE HONORABLE THE COMMON COUNCIL
OF THE CITY OF NEW YORK.—Gen lemen—
Your attention is es reserve called to the fifthy condition of the
Sixteenth Ward, being left fatherless and alone. The only
source of relief is to make our complaints known to your honorable body, that some provision may be made adequate to
the wards of this, our windowed section. Since the decease of
our most worthy Aldermen and Amistru. We claim, by the
usual custom, that a God-father be substituted, with power of
action. calling and praying the high autholty of the 10th and
17th Wards, that some good, morel may, (one from the 17th
would be preferred, to act in conjunction with the keeper of
the Union Perk) by their tespecial recommendation, may be
the means of reconciling as to ans becaused condition. We
would suggest one idea for the consideration of the ex-lied
disarrable would in such be well for us to form some essociation
like the watch deportment; for instance—they have contribute
deliberably the enormous sum of two dollers each, end two
ends have been accomplished; first—a change in the board, and
lardy, (not less), by any means)—a permanent sination on the
watch Now, let our essociation work a different results—let
two, dollars a pirce by given by all the argreeved of the 16th
Ward. Our causes of give will vanish—our streets, with the
and of the Corbox, with be in a healthy condition, and we will
have men to represent us.

THIRTY DOLLARS REWARD.

THIRTY DOLLARS REWARD. THIRTY DULLARS REWARD.

WHEREAS, JOHN LAKE, an apprentice, seed ninetren years, left the house of his employer on Sunday last, felonically taking with him cosh, the property of the said employer, to the amount of \$165, the above reward will be paid on conviction of the offender rad recovery of the property, on conviction of the offender and recovery of the property,—height about 5 feet 8 inches—weak eyes—downcest look—strong built—he walks generally in a careless, swergening way—by trade an umbrella maker. He having purchared eew ciothes since he departure it is found impossible further to describe him.

spece of time, but I ways at the expense of the system, by enseebing it and rendering it more lisble to receive again other
complaints.

The same high medical authority, in describing the simple
victues of this medicine, savs: "As it differs in meany respects
very exsectially from the pills that have hitherto been brought
before the public, it is advisable to make the public acquainted
with the general properties they possess. Par's Life Fills, as
a purgative, are found to act very gently—indeed when they do
purge freely, it is owing less to their purgative qualities than
the very bad condition of the system they are acting upon. The
vegetable ingredients of which they are attrictly composed, will
in all instruces chemically decompose the deleterious matter
that is generated by various canses, and impedes the vital and
organic operations of nature in the human frame. Their action
is principally by decomposition—invigorating by increasing the
tene and quality of the blood—strengthening all the organs effectually without any of that stimulating effect so injurious in
purgatives generally."

They are sold retail at most of the respectable druggists in
New York, and by duly appointed agents in every city and
town from Maine to Louisians, Canada, the British provinces,
Havana, the West India islandi, and South America, in boxes,
30 and 55 cents each.

Testimonials of cure from person: whose diseases were of the
most inveterate kind, and of long standing, may be seen at the
office lat Hoot.

to their invaluable Medicine, "Par's Lafe Pills," and i's officecy being now fully tested, and i's success era curative erralished, beg to sit te that no medicine ever offered to mankind
has so rapidly obvined such distinguished celebrity, and it is
questionable if there is any part of the civilised world where
i's extraordinary healing varieus have not been exhibited.

The proprietors are therefore doubly axious to recommend
the fills to those whose loss of health by dyspersis or rheumatic affections require a speedy and cervin renovation.

The opinions of its value by some of the best medical menof the day is a rure foundation that is success does not depend
upon any system of adventising or meriticious puffing, but
upon its own virtues amorget those whoelectionsive medical acquirements and high chas etter for interrity, place them out of
the possibility of aiding quackery. Thomas Rober & Co,

(\*18 THAT YOUR OWN HAIR OR A WIG," said

Shetidan to a countryman, whom he met carrying a hare, and by so saying he won a wager made with the Prince of Wales, that he would make the worst pun his royal Bighness ever heard. No man who was sane could put Sherican's question to any one who had used Jayne's Hair Tomic, even though he had seen the individual perfectly bald within the menth, for the hair produced by this invaluable preparation is even softer, more glossy, and more luxuriant that that which nature originally supplies. If the haar is falling off, it will at once arrest the work of spoilation, and by removing all obstructions from the porce of the scalp, facilitate the circulation of blood and meisture so absolutely necessary to the sustenance of the roots. If used when the hair is beginning toturn grey, it will prevent that portion remaining uncharged, from whitening.

Sold by A. B. & D. Sands, Dragsists, No. 75 Fulcon street, coraer of Gold. Also, sold by D. Sands & Co., No. 77 East Braas way; A. B. Sands & Co., No. 273 Broadway. Price \$1.
